 Sameer Rajbhar

SUMMARY

AI/ML Engineer with hands-on experience in Generative AI, RAG, Deep Learning, and NLP. Built and deployed 5+ full-stack AI applications (multi-modal assistants, resume analyzers, image classifiers) using Python, PyTorch, LangChain, and FastAPI/Flask/Docker. Actively expanding into cloud deployment and agentic AI frameworks.

SKILLS

Language & Libraries

Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, PyTorch, NLTK

Machine Learning

Supervised Learning (Regression, Classification), Unsupervised Learning (Clustering, PCA), Feature Engineering, Model Evaluation, ML Pipelines, EDA

Deep Learning

MLP, CNN, RNN, Model Training, Loss Functions, Backpropagation

Generative AI

Transformers, LLMs, Prompt Engineering, RAG, LangChain, OpenAI API, Hugging Face, ChromaDB

MLOps

FastAPI, Flask, Docker, Git/GitHub Actions (CI/CD), AWS (S3, EC2), Model Deployment

PROJECT WORK

Multi-Modal AI Assistant

Built a full-stack AI assistant using Flask and GPT-4o with RAG-based document Q&A (ChromaDB + SentenceTransformers), image understanding via vision, AI image generation (gpt-image-1), and a complete voice pipeline (Whisper STT + OpenAI TTS). Supports PDF, DOCX, CSV, and Excel ingestion with LangChain chunking and persistent vector storage.

Production RAG Application

Built a full-stack Retrieval-Augmented Generation system using Flask, ChromaDB, and OpenAI GPT-4o-mini with support for PDF/DOCX/TXT ingestion, semantic chunking via LangChain, and cosine similarity-based retrieval using SentenceTransformers.

AI Resume Analyzer

Developed an AI-powered resume analyzer using FastAPI / Flask and OpenAI API to evaluate resumes, provide ATS score, identify skill gaps, and generate personalized improvement suggestions.

Cat vs Dog Image Classifier

Developed a CNN-based image classifier using PyTorch to distinguish between cats and dogs. Integrated the model into a Flask web app enabling real-time predictions on uploaded images.

Text Summarization

Built and deployed a dialogue summarization web app powered by a fine-tuned T5 transformer, featuring a FastAPI backend with beam search decoding and a real-time browser interface — trained on the SAMSum dataset using HuggingFace Transformers and PyTorch.

EDUCATION

Bachelor of Commerce (B.Com) University of Mumbai

2025 - 2028

XII(HSC) Limra English School & Junior College

Feb 2025

CERTIFICATIONS

Artificial Intelligence & Machine Learning — Prime Batch Apna College

April 2026
